**Have Fire tools and water ready.**

**Not burn when windy.**

**Don't leave unattended.**

**Understand restrictions**

**Be responsible!**

## **If Campfires Are Allowed**

- ◆ Campfires are allowed if you follow these requirements and if you are the property owner. If your campfire is deemed unsafe you will be cited and the campfire will be extinguished.
- ◆ Campfire pit should be dug into mineral soil. Remove all litter, duff, roots, overhanging branches, stumps, logs, dry grass, pine needles, leaves and any other flammable material within a 10-foot diameter circle. Line the perimeter with rocks, building blocks, metal or concrete. Flame length should not exceed two (2) feet in height. *No bonfires.*
- ◆ Do not leave unattended.
- ◆ Have available at campfire site, a shovel , charged hose or 5 lb. ABC Fire Extinguisher. Don't have a campfire if windy.
- ◆ Drown the campfire with water. Be sure all material has been cooled and extinguished. Do not bury the hot embers—campfires can smolder and escape your campfire ring during windy times.
- ◆ Be aware that if you cause a fire, you are liable for suppression costs and any resulting damages.
- ◆ No material will exceed the campfire perimeter—nothing overhanging the sides of the campfire perimeter.
- ◆ No burning of household rubbish.
- ◆ You will be held responsible and accountable for the actions that occur on your property.
