

Are You Ready?

Is Your Property ready

For

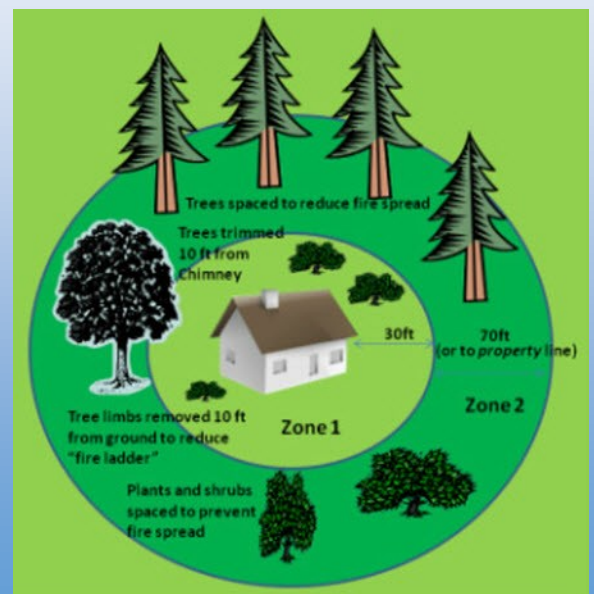

Fire SEASON?

Create your defensible space NOW!

Creating defensible space is your property's front line of defense against wild-fire.

70+foot:

- 1) Create space between trees to slow spread of fire (Branches don't touch)
- 2) Thin vegetation to create space between trees (Thin to 12'x12')
- 3) Create space between plants, shrubs and trees (remove flammable fuels)
- 4) Remove low tree branches (Prune up 8-10' or 1/3 tree height)
- 5) Replace wood shakes/shingles with asphalt, composition shingles (Class A) or metal roofing.
- 6) Ensure your address is visible so firefighters can easily find it. *Cant help you if we can't find you!*
- 7) Thin, Prune and remove flammable fuels to above standards within the 1st 20-feet along your property line. (Developed or vacant lot).

Living With Fire
